WordPress
GET A CERTIFIED DIPLOMA

WordPress is the world's most popular self-hosted blogging solution, it's also an open source CMS (Content Management Solution). WordPress is known for it's blogging capabilities, but being a CMS as well it can do nearly anything that can be done within a web site.

Is this the right course for you?

Learn how to create your own website or blog with this powerful publishing platform. This course will explain how to create and publish posts and pages, customize your site with themes, widgets, and custom menus, and extend WordPress even further with plugins.
